- Assistant Professor, Indus Design School (Ahmedabad, July'18-August'19)

Keywords

Making, Sharing, Maker-Movement, Hands-on, Experimental

Overview

Most of us have our own "To-make List" which is an ever-filling parking-lot of ideas for projects like a cool tote-bag from old denims, or a stylish earphone-pouch, or a funky portable light-box for drawing or even trying printing/dyeing to make our own t-shirts. One can of course buy them, but we want to make them ourselves, mostly just for its own sake, but also for the excitement, satisfaction and pride of using something we made ourselves. This workshop is about nudging our inner maker/tinkerer and get back to Making something, by and for ourselves.

Course Code: **OE2020** | Seats: **14**

CAMPUS: Ahmedabad

Objective

To inculcate certain qualities/ sensibilities/ important skills of Making to designers -To democratize the process of Making -Participants of this workshop will be documenting the process and sharing that with the world in the form of a simple instruction-based tutorial. (video/ blog/ booklet)

Methodology

Presentation about Making and Maker-movement, materials and processes -Mind-mapping and brainstorming -Visualization and Hands-on building of concepts/models - Documenting the entire process and making a "How to make...." Tutorial. -Exhibiting the objects and their tutorials.

Deliverables

Tangible Objects (within human-scale) made by participants for themselves along with a physical/digital tutorial. (blog/video/printed)
