

MOVING OBJECTS

Kinetic installations

OE2239

INSTRUCTOR

ELIZABETH JOHN

Independent consultant

Design professional with over 15 years of multidisciplinary experience spanning domains of Design, Research, Strategy & Academics. . While User Research and product design remains the largest volume of work, Kinetic installations have been a more recent area of work. The domain is very close to my heart.

OVERVIEW

The workshop will explore motion (in objects) and its sensory nature. An object in motion can change the way we perceive a space. It may call our attention to how natural elements like air, light humidity etc work in the space, react to people entering/moving through it or simply add a sense of play, wonderment or beauty. Here we will explore motion and how Kinetic objects change / redefine spaces.

OBJECTIVE

To explore motion & how kinetic objects change / redefine spaces

METHODOLOGY

The participants will initially work with materials like paper. After identifying a space & direction they want to develop, the idea will be detailed, prototyped & showcased in the identified space. Prototypes will be executed in groups.

KEYWORDS

Moving objects, Kinetic Installations

WORKSHOP MODE

Online

February 14 - 25, 2022
