# ENGAGING CITIZENS TO PRESERVE URBAN WATER BODIES

## INSTRUCTOR

### SUDHESH UNNIRAMAN

Sudhesh has worked primarily as a Content Head, Director, Creative Director, Content Creator and Writer for over 25 years on a variety of subjects ranging from climate change, popular science, health, armed forces and current affairs. Sudhesh has produced over 500 hours of broadcast content and has directed films and shows for BBC World, Star TV (Asia), Discovery (South Asia), Nat Geo (South Asia), History Channel (South Asia), Travel Channel (UK), TIMES Network (India) and Doordarshan (India). In 1997 Sudhesh was commissioned by Films Division India to be Executive Producer of Nirankush (35mm, Hindi) a fictionalized account of female infanticide, shot on location in Rajasthan. This film won the National Award for best socially motivational film (1998). In 2009 a film directed by Sudhesh, The Agony of the Ganges was awarded the Best Film on Environment & Nature at the INKAFEST, Huaraz, Peru.

## OVERVIEW

“Our cities have several water bodies that are neglected or fallen into disuse. Most urban dwellers are not aware of them or tend to ignore them. These water bodies can be a source of life and recreation for urban communities. The workshop aims to create awareness about these water sources, understand how they can be of help to citizens and help create an environment where citizens help preserve and rejuvenate lakes, canals and wells in their city.”

## KEY WORDS

Preserve urban water sources
