FUTURISTS" RELIANCE ON WATER ON THEIR URBAN VISIONS

INSTRUCTOR

PRIYANKA KANHARE

Priyanka is an Academician, Researcher, and a practicing Architect and Landscape Architect. She is a Visiting Faculty at CEPT University, Ahmedabad, and Navrachana University, Vadodara. Besides this, she also conducts workshops informing ways to Represent and Document the Intangible Cultural Heritage of People and Places. As a visual narrator, I work with Sahajeevan Trust, Bhuj, for the nomadic pastoralists exhibition. I hold a keen interest in mapping urban biodiversity in Urban areas.

CO- INSTRUCTOR

Maulik holds a diverse educational background, including an M.Des in Building Products and Systems from CEPT University, a B.Des in Industrial Design from GLS Institute of Design, and a Diploma in Automobile Engineering from LJ Institute of Technology. As an industrial designer at On2Cook, he blends creativity and innovation to shape innovative products. Additionally, he is also a

OVERVIEW

By the year 2050, approximately 50% of our population is projected to live in urban and peri-urban regions. This will strain urban water resources. The workshop centers around the representation of physical manifestations of the riverine landscapes of Sabarmati and the potential for future configurations in the form of room-scaled models embellished with projection mapping and dioramas. This study aims to investigate the role of water in influencing and improving the visual appeal of urban landscapes. It will encourage participants to explore water's many uses as a strategic resource for imagining future urban environments.

KEY WORDS

River, Immersive Exhibit, Intangible Associations
