# MEMOIRS OF SMELLSCAPE PROMPTS

## OVERVIEW

Do you recall the last time you encountered a smell which took you back to your grandma's kitchen? The fresh scent of monsoon rains made you close your eyes to experience nature reviving itself? Is there a smell that reminds you of your lover? In the world of visual overload, let us pause and observe our surroundings with a less consciously used tool, the nose. This could open up multiple avenues for design interventions. In this workshop, we take a dip into the ocean of smells around us and re create the multi-sensory experience.

## METHODOLOGY

Introduction, Smell vocabulary, Experience smells, Document | data collection, Data Analysis and Re-create experience

## KEY WORDS

Smellscapes, Olfaction, Multi-Sensory, Experience

## AVAILABILITY

12 Seats
