# WATER, WADERS AND WHEREABOUTS

## INSTRUCTOR

### KISHAN MEENA

Based in Shivdaspura, Kishan has been working for bird conservation since last 15 years, and over time, he has been able to document 313 birds in and near Chandlai lake, which is the highest record by a single individual.

## OVERVIEW

The workshop aims at enlightening and establishing a deep connect between our water bodies, the waders, the habitat and the sciences that work to balance the environment around it. The curriculum aims at providing a holistic approach to sensitize the least heard requests of our migratory and residential guests.

## KEY WORDS

Water, Birds, Conservation, Art & Design

## AVAILABILITY

20 Seats

We also plan to help the learners create a world that is aesthetically designed to support their lives and how through different art forms we can Conserve and protect them.

## CO- INSTRUCTOR

### Dr. SHWETA SHROTRIYA

Dr. Shweta is a keen student of bird behaviour (Ornithology) and photography from last 3 years, although its completely different from her field of study (Management)
